Our Mission

The mission of Glorystar is to impact the world for Christ through media distribution. To qualify for the Free Ministry Support Services provided by Glorystar Satellite Systems, a Christian broadcaster's core principles should agree with the following:

- Jesus Christ is our Lord and Savior
- Jesus Christ died on the cross for our sins
- Jesus Christ rose again so that through Him we have eternal life

Glorystar Channel List (70 Channels and Growing)

The Glorystar Christian Satellite package provides Christian viewers unprecedented number of Christian and family-friendly channels with no monthly fees. Many of the Christian broadcasters available on Glorystar are not available in the limited access provided by local television broadcast, cable or pay-service satellite television packages. New Christian broadcaster are added regularly to the Glorystar Free Christian Satellite System.

Free to Air-FTA Broadcaster

In North America hundreds of channels on several satellites are transmitted unencrypted. These unencrypted channels are commonly referred to as "Free to Air" (FTA) channels. Free to Air channels are completely Free and Legal to view by anyone in 31 countries including the US, Canada, Central America, Mexico and the Caribbean without having to pay a fee or have a programming subscription (Over 480 Million people can receive the broadcasts from a single satellite). The cost of the signal being transmitted by the satellite is paid for by each broadcaster; who then chooses to distribute their programming free of charge to the viewer. There are over 70 Christian broadcasters currently spreading the Good News to churches, television stations, cable head-ends, and to individual homes using this method of transmission through Glorystar Satellite Systems.

Direct to Home

Direct-to-Home (DTH) satellite broadcasting is the distribution of television and/or radio signals from high-powered geostationary satellites (the satellites stay in the same location in the sky) to small dish antennas and satellite receivers in homes across wide geographical areas. The available DTH broadcasting systems such as Glorystar Satellite Systems, Dish Network and DirecTV provide viewers with additional options for obtaining a diverse range of Christian programming where local cable or local television broadcast options are limited or nonexistent. Broadcasters can choose between a Free to Air (FTA) "open broadcast" or can incorporate an "encrypted" or scrambled technology in their systems in an effort to offer subscription based services and/or to prevent nonpaying customers from viewing their channels.

Easy to Install

Installing a Glorystar Free Christian Satellite System is very similar to installing a DirecTV or Dish Network system. All Glorystar receivers are shipped pre-programmed with all available Christian channels. Glorystar Free Christian Satellite Systems automatically update when a new channel is added, without the need for the viewers to reprogram their receiver. This feature makes the Glorystar satellite system package the easiest FTA satellite equipment packages to install and maintain. Additionally, Glorystar provides a complete step-by-step installation guide with personalized aiming instructions with every order to allow “do it yourselfer” types to save money by installing the Glorystar satellite equipment package themselves. If a customer prefers a professional installation, they can visit <http://www.ftainstall.com> to find a qualified installer in their area.

Satellite Reception Equipment

The base technology behind Free to Air satellite reception equipment is similar to the technology used by the major subscription satellite programming providers such as DirecTV and Dish Network, however; the equipment distributed for these subscription satellite services cannot be used to receive FTA broadcasts as their equipment is designed exclusively for the reception of their pay services. As the name implies, Free to Air satellite reception equipment are “open systems” allowing the broadcasters and Glorystar to provide services without need for monthly fees or requiring subscriptions.

Glorystar Satellite Systems

The Glorystar Free Christian Broadcast signals are carried by FCC regulated satellites which transmit lower power signals than the subscription services. This service operates at a lower cost and allows the Christian Broadcast Ministries to provide their programming free of charge (The higher the power, the shorter the satellite life span, the faster the satellite must be replaced). In an effort to optimize the viewing of the Free Christian Broadcasts, Glorystar provides high quality 36” satellite dishes throughout the US, Southern Canada, Mexico, Central America and the Caribbean. Larger dishes may be needed in the more remote regions of North America and are recommended for all commercial installations. Please note: the FCC protects an individual’s right to install up to a 39” dish to receive satellite broadcasts on their private property in the US.

Marketing

The Glorystar marketing plan is powerful yet simple. Glorystar asks that each Broadcaster simply asks their current viewers and donors to tell their friends that their favorite channel is on Glorystar and part of the Free Christian Channel Package featuring over 60 Christian Channels with No Monthly Fees or Subscription requirements. Broadcasters have been successful in relaying this simple message during live shows, ad avails or advertising spots, on the Ministry website, in monthly newsletters, print advertising and at special events and conferences.

Glorystar provides a complete range of marketing tools to help Christian Broadcasters without a dedicated marketing team to better communicate with their viewers. This includes all custom flyers and brochures to be used for conferences and live events, web banners and graphics, print advertisements, television spots and scripts. Broadcasters can choose to use the marketing materials provided by Glorystar or Glorystar can provide all the elements so that they can create their own customized message.

Additionally, Glorystar provides all Christian Broadcast Ministries with a unique toll free 800 number and a Broadcaster specific web site to help track and report to your ministry monthly with a list of all customer telephone numbers and new customer mailing information.

More Information

Please contact us directly to get additional information about the Glorystar Free Christian Satellite System, broadcaster support services, live satellite broadcast productions, uplink facilities and/or transmission options, (LPTV) low power television head ends, cable head ends, IPTV head ends, church facility installations, prison installations, and (DTH) direct to home sales or any other satellite related questions that your ministry needs answered. All Glorystar Direct to Home Support Services are provided Free of Charge to Christian Broadcast Ministries.
