How to scan for 3ABN Dare To Dream, 3ABN Latino Radio and 3ABN Proclaim

3ABN has added new channels 3ABN Dare to Dream (D2D) and 3ABN Latino Radio. The 3ABN Proclaim channel has been moved to a new frequency. Current Glorystar receivers will be automatically updated to receive these channels. Automatic updating models are: GEOSATpro DVR1100 / DSR100 / DSR200.

If you have an older receiver (Manhattan, Topfield, Fortec Star) the best method for updating your receiver for all of the Adventist Channels is to delete current programming, scan for the new channels then delete the unwanted channels. Free step by step instructions are provided below for receivers distributed by Adventist broadcasters.

We highly recommend the purchase of a complete Glorystar system or upgrade your old receiver with a new Glorystar receiver. Glorystar receivers have all channel changes in place and automatically update to add new channels as they become available. Please call us at 866-597-0728 and ask the sales team for a Glorystar system or receiver upgrade to watch all the current channels and automatically add any new Glorystar channels.

Manhattan SKYLINE 1000

Important Notice: Your FREE Adventist channel scanning instructions are provided below. Telephone assistance may be available at an additional charge for "Out Of Warranty" equipment.

If you require additional assistance, please contact the company or broadcaster where you originally purchased your satellite system.

1. Using your Manhattan SKYLINE 1000 remote control press the "MENU" button
