

Where Faith Blooms

Psalm 103:15

As for man, his days are as grass:
as a flower of the field, so he
flourisheth.

Frequently Asked Questions

How can Glorystar provide Free Christian Satellite channels without monthly fees?

Each independent Christian channel pays for their own unencrypted satellite signal and chooses to distribute their programming free of charge to the viewer. This makes it possible for Glorystar to provide family friendly and 100% digital satellite channels to viewers throughout North America without charging a monthly fee or need for subscriptions.

Are Glorystar dishes HOA approved?

The Federal Communications Commission (FCC) has ruled that local government zoning or homeowner's associations may not prevent the installation of satellite antennas 39" (one meter) or smaller in diameter unless legitimate restrictions such as safety fire codes are in effect.

For details: www.fcc.gov/cgb/satellite.html

What are my options for installation?

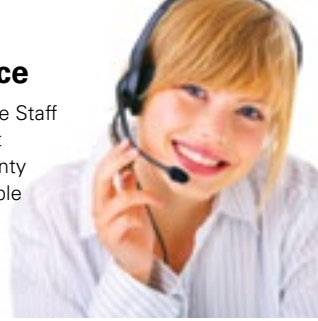

Over 80% of Glorystar owners have self installed their Glorystar system or have had a family member, local church layperson or friend do the installation for them. If these options are not available, you can contact a local installer through your Yellow Pages listings or find an installer referral from www.ftainstall.com. This website provides a **FREE** service that helps connect satellite equipment owners to professional contractors, hobbyist and laypersons in their local area who have experience installing and servicing the selected satellite systems.

Will Glorystar work at my home?

It is essential to have a safe and secure place to mount the satellite dish and have clear line of site to receive the satellite signal. The dish must be pointed directly at the satellite with absolutely no obstructing objects. Satellite signals cannot pass through leaves, tree limbs, or through glass. The satellite is located south of Texas directly over the equator. Visit the website www.geosatfinder.com to identify exact coordinates of the satellite and find the direction and elevation for your location.
